TLDR

1) Open the images from the wetransfer link in Lightroom.
2) Pick three favourites from each category, including projects and mark them with using 'P' (to set the 'Picked' flag - 'U' is undo).
3) Return lrcat file to Tim before the end of August.

Hi Judges,

Firstly, thank you very much for your judging results, I've processed them all and compiled a set of final results and we've checked them all against the RAW files that were submitted by our entrants. Out of these, we've compiled a set of photos for each of you to choose your top three images from each category. There are about 79 images in Grand Scenic, 93 in Intimate Landscape, 60 in Abstract and Detail and 26 projects. You should receive a wetransfer sometime around now with those images.

We've included some extra data to help you select your favourite 3 images from each category

1) The star rating shows your score from the previous round so you can quickly get at your favourite five star images.

2) In a bit of a hack, I've put the 'combined' score in the 'Country' field. You can then sort by the combined score using 'Sort > Country' (in the Toolbar - toggle it using T)

3) The caption and title of each image (which you can see in the Library Metadata tab in Lightroom) shows the scores that the other judges gave for each image e.g. Title might be

`L:5 | Combined: 3.4`

And caption might be

`scores = R5 L5 M5 P3 H4`

This means that one person gave it a 5 two people gave it 4's, one a 2* and on gave it zero stars.

If your image has a high combined score, it's more likely to be chosen by everybody at the live judging phase.

If your choice looks like this

```
scores = L5 B0 V0 M0 F0
```

The chances of it winning are slim. However, if it's still your favourite and you think you can convince people that it should win, you can still choose it!! We've had images that were only one person's favourite go on to win categories. That's the fun of final stage judging!!

I hope this makes sense. In summary

TLDR

1) Open the images from the wetransfer link in Lightroom.
2) Pick three favourites from each category, including projects and mark them with using 'P' (to set the 'Picked' flag - 'U' is undo).
3) Return lrcat file to Tim before the end of August.
